				100.00

## Operating instructions

- Sprinkle Carbopol® ETD 2050 over the water of phase A1 heated to 75 °C.
- Add premix A2 into A1.
- Prepare B and heat to 70 °C.
- Under rapid mixing (Rotor/Stator 3000 rpm), add B to A1+A2.
- Maintain rapid mixing for about 5 minutes.
- Neutralize with C and continue rapid mixing for about 5 minutes.
- Cool under mixing and at about 30 °C, add D.

## Express Smoothing Serum

1666-2.04

+ Smoothing

+ Relaxing

+ Exquisite velvet touch

### Description

A soft white serum with a very fluid and velvety texture, thanks to Emulium® Delta MB. High comfort is provided when applied on the skin and the finish is soft and relaxing. Lines are reduced and smoothed due to Gatuline® Expression AF.

### Specifications

+ Aspect:  
Soft white serum

+ pH = 5.5 ± 0.5

+ Viscosity Brookfield (spindle A, speed 5):  
approx. 6 640 mPa.s after 24h

### Ingredients

- **Emulium® Delta MB** at 2% creates a soft milky lotion.
- Glycerin and Octyldodecanol are moisturizing agents providing nourishment and soft feel without any greasy sensation.
- Carbomer and Xanthan Gum are gelling agents that help to stabilize.
- **Gatuline® Expression AF**, clinically tested, reduces expression lines instantly thanks to a myorelaxing activity.
