Operating instructions

- Heat A1 to 75°C and solubilize sodium benzoate.
- Disperse on moderate shear (1500/2000 rpm) A2 into A1 maintained at 75°C for 10 minutes.
- Add A3 and disperse for 10 minutes into A1+A2.
- Heat A4 to 75°C, when Eumulgin® SG is solubilized, add to A1+A2+A3.
- Heat B to 75°C.
- Make the emulsion: add B to A and increase the speed until high shear (3000 rpm) for 10 minutes.
- Cool on moderate shear (1000 rpm).
- At 35°C, add C and D.
- Cool to 30°C.

Description

Keep your head in the stars with this natural lunar mask: its gray texture spreads easily on the skin to leave an energizing layer on our epidermal «crust», thanks to Emulium® Kappa MB. Once removed, the skin, revitalized and protected from negative waves with the help of EnergiNius™ and Gatuline® Radiance, has a cosmic glow!

Specifications

+ Aspect:
Pearly gray mask

+ pH = 5.0 ± 0.5

+ Viscosity Brookfield RV (spindle B, speed 5):
approx. 51 000 mPa.s after 24h

Ingredients

- The powdery texture of this mask, due to the presence of different powders in the aqueous phase, gives it anti-seborrhea properties.
- Tapioca starch present in this phase, heated to more than 70°C, is used as a gelling agent.
- **Emulium® Kappa MB**, used at 4%, creates a luxury texture.
- **Gatuline® Radiance** is a natural active enhancing skin radiance and luminosity by boosting skin microcirculation.
- **EnergiNius™** is a natural active clinically tested protecting the skin from screen-emitted light.
