				100.00

Operating instructions

- Disperse Avicel® PC 591 under rapid mixing (2000 rpm) about 15 minutes into the water of phase A1 heated to 75 °C.
- Add premix A2 into A1.
- Prepare B and heat to 70 °C.
- Add C to B.
- Under rapid mixing (Rotor/Stator 3000 rpm), add B+C to A1+A2.
- Maintain rapid mixing for about 5 minutes.
- Cool under mixing and at about 30 °C, add D and E.

Exquisite velvet touch

Description

A blue soft serum, perfect to relax and to detoxify from time to time, thanks to a Malachite extract. This essence has a very soft texture, is very easy to spread and really pleasant to apply. It dries really quickly to leave a soft powdery finish.

Specifications

+ Aspect:
Soft light blue serum

+ pH = 5.5 ± 0.5

+ Viscosity Brookfield (spindle A, speed 5):
approx. 7 560 mPa.s after 24h

Ingredients

- **Emulium® Delta MB** at 2% creates a velvety milky lotion.
- Dimethicone and Cyclopentasiloxane, Cyclohexasiloxane, feeling agents, give slip upon application.
- Microcrystalline Cellulose (and) Cellulose Gum and Xanthan Gum are gelling agents that help to stabilize.
- **Mala'Kite™** is an active from Africa with anti-oxidant and detoxifying properties; it also gives a stable and natural blue color to the formulation.
